JUN 27 1996

I was quite delighted to get your letter of June 19th, and will be sure that your name is prominently posted in various relevant networks as a unique source of expertise.

Your 1993 work is quite familiar to me; and I have pointed to intervention in cytokine action as a necessary ingredient in planning for medical treatment of potential mass casualties. Thank you for the more recent reprints.

It would be good if we could meet. ARPA will be putting new money into BW-defense-related research: perhaps a case can be made for the genomic study you advocate.
